BSMS MONTHLY LECTURE SERIES

FOR SECONDARY SCHOOL AND COLLEGE STUDENTS

Dr Malcolm Johnston

Interventional Radiology: The Modern Surgical Revolution

Interventional Radiology is a new speciality that has developed from nothing over the past 40 years, driven by developments in cutting edge equipment, new device technologies and new methods of imaging the body. This talk will look at some of the exciting new procedures that we can now perform through tiny incisions, embracing the world of nano-technology. We will also look to the future with the development of modern targeted cancer treatments.

Wednesday 7 July, 6:30pm - 7:30pm

Talk to be delivered online via Zoom videoconferencing

Tickets are free but must be booked online at: https://bit.ly/2RCayKx
