"I just wanted to thank you sincerely for the card for my birthday. That you find the moments in an unprecedented time for the world, let alone education, speaks volumes for the care that you show for the staff and the College as a whole. When I first came onto the team I wasn't sure whether this would be a long term fit for me but over the past year I have really integrated with the school, with my tutor group and gymnastics and now I really, really love it here. That's a testament to the culture that you set out for us all.

Thank you again."

"Just wanted to say thanks to yourself and the team at Ivybridge for all the work and care you are all putting into the transition period. We all know that we will be walking in a different pair of shoes come September, and pray that they will fit well and be comfortable.

So thanks and stay safe."

"We had a really successful day for the first Year 10 Friday support session last week. Thank you to the teachers who called home to praise students who attended. Parents unanimously thanked us for our support. One parent also commented that it was amazing that their son made a new friend on the day too!"

"It's been an amazing first week back, I loved teaching our A level Geographers and seeing staff and students again."

"Just a very quick email to say how nice it has been to be back in college this week. Hannah, with the support of ML and pastoral staff, has done everything she can to ensure that we have felt safe and supported, allowing us to fully focus on our lessons.

Thank you for everything you, SLT and all the unseen administration and support staff have been doing to support us in getting back into College to have the face to face days.

I have felt supported, safe and valued this week and that is down to the ICC team doing what it does best - going above and beyond."

"Today was great, thank you all, it was really nice to mix with other departments and I felt we had great kids and everything was really well organised.
I'm now really looking forward to my next day in!"
