

In order to reduce the College's environmental impact, you are requested to recycle wherever possible at school.

In summary, there will now be three bins in each classroom:

1. 'Mixed paper and card' – blue bag
2. 'Plastic bottles' – clear bag
3. General waste bin

Other plastic, such as crisp packets, cling film and wrappers, cannot be recycled at school and must go in the General Waste bin to reduce contamination.

General waste

Make Ivybridge Green Again

Why should we be recycling?

- ✓ REASON 1. The earth only has a limited amount of resources. Once they are gone, that's it!
- ✓ REASON 2. By reusing materials, we reduce the amount of greenhouse gases that are produced. This slows down climate change.
- ✓ REASON 3. Many species of plant and animal are at risk of extinction due to our use of plastic in particular.

This change has happened due to dedicated students like you.

ARE YOU INTERESTED AND WANT TO MAKE A DIFFERENCE?

Come to Sustainability Group – we meet every Thursday lunchtime in D202.

The future is litter-ally in your hands.
