

# Work experience opportunities 2020

Babcock (Devonport) have an exciting opportunity of two work experience weeks for students in year 10.

## Future Engineers programmes

The Future Engineers Programme offers 35 students the opportunity to undertake a Design, Make and Test project alongside skilled engineers to reach their full potential. Each student will be given the opportunity to develop leadership, problem solving and presentations skills as well as exploring the site via organised tours on Warships and Submarines to name a few.

Future Engineers Programme will be held week commencing 6 July 2020 

## Corporate Services Programme

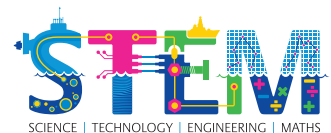

The Corporate Services Programme will provide 10 Students the opportunity to work alongside colleagues in Finance, Commercial and Supply Chain. Students will be required to select which area they would like to gain experience in.

- › **Finance/Accountancy:** With annual revenue of over £5.2bn in 2019, it's fair to say our finances need just as much expertise as our projects. During the week you'll have the opportunity to explore what it takes to work in a finance team whilst developing you analytical, mathematical and communicational skills.
- › **Commercial:** From the latest submarines and supercarriers to the UK's first new nuclear power plant in over 20 years, we've secured some of the most extraordinary engineering projects. On this exciting Programme you'll continue that trend as you could be providing commercial support to elements of multi-million pound bids or existing contracts, or working with our business development teams to identify new opportunities within Babcock.
- › **Supply Chain:** Do you know how many parts go into a submarine? Whether designing, building, operating, managing or maintaining vital assets, one thing is certain – supply chain management lies at the heart of our operations and plays a pivotal role in our business success.

Corporate Services Programme will be held week commencing 29 June 2020.
