

## Chartered Teacher Programme | 2020-21

As you may know TSSW are working with the Chartered College of Teaching to deliver the Chartered Teacher Programme this year.

The Chartered College have collated a whole range of materials to support schools during COVID-19 and I thought it I would share some of the free resources they've shared with us:

**Covid-19 and teaching** - this page is where they collate all useful information from across the education sector, public health and any government advice related to coronavirus for schools so is a useful reference point.

**Teach together** - this is a free text messaging service launched to support teachers during COVID-19 where teachers receive positive messages, links to wellbeing resources and useful activities each week.

**VLOGs** - a collection of videos from a range of guest speakers on topics such as 'remote learning' 'teachers and leaders supporting local communities' and 'leading a school in a difficult time'.

**Online distance and home learning: selected reading** - this is a really useful collection of articles, blogs and resources about online, distance and home-learning and CPD.

**Impact Journal (free download)** - if you are thinking about teacher CPD, you can download a free sample of articles from the Chartered College's journal 'Impact'. It includes some great articles about curriculum, metacognition and student motivation which are all well worth a look.

We hope this might be of some use to you and your team at the moment (you can also sign up [here](#) to receive updates about free resources directly from the Chartered College of Teaching).

CHARTERED  
COLLEGE OF  
TEACHING
