

Coastal Landscapes Enquiry Task 1

Name: _____

Assignment

Your task is to create a three sided A4 report focused on the Jurassic coast. Your report must be based on the four articles referenced below. The report must have the following sub-headings: Features, Geology, Cliff erosion and processes, Management issues, World Heritage Status. Level & success criteria include located examples, annotated diagrams and precise maps. Sentences must be ordered and the report should have clear structures with outstanding QWC.

Articles: Available via Geography Link on Webpage

- A Rae (2002) A Human Impact on the Dorset Coastline Geoactive 420 Nelson Thorns
- A Rae (2010) Sustainable Tourism: Knoll Beach Dorset Geoactive 426 Nelson Thorns
- Jurassic Coast Mass Movement Processes
- G. Atterton(2005) The Jurassic Coast Case for a World Heritage Site Geoactive 325 Nelson Thorns

Level & success criteria

A* Case study named and located in precise detail, maps included. Describes the geological structure and physical processes in operation along the Jurassic coast. Clearly links coastal landforms to coastal process. In depth assessment the role of sustainable management along the coast. A thorough review of its status as a World Heritage Site. Landforms of erosion and deposition described and explained in detail using key terminology. Reference is made to all four articles.

A Case study named and located in detail, maps included. Describes the geological structure and physical processes in operation along the Jurassic coast linking coastal landforms to processes. Landforms of erosion and deposition described and explained in detail using key terminology. Discusses the role of sustainable management along the coast and its status as a World Heritage Site. Referenced to located examples, labelled diagrams and maps. Sentences ordered, clear structure. Excellent QWC. Reference is made of all five articles.

B Case study named and located in precise detail, maps included. Describes the geological structure and physical processes in operation along the Jurassic coast. Links coastal landforms to coastal processes in operation and describes the role of sustainable management and its status as a World Heritage Site. coast. Landforms of erosion and deposition described and explained in detail using key terminology. Reference is made to most articles.

C Case study named and located. Describes the geological structure and physical processes in operation along the Jurassic coast. Outlines the role of sustainable management and / or status as a World Heritage site. Landforms of erosion and deposition described and explained. Reference is made to some articles.

D Case study named, but not fully located. Geological structure and processes may not be outlined. Only general information on the landforms of erosion, deposition and sustainable management. Sentences may lack structure. Poor QWC.

Reflection How much effort did you put in? What will you do next time?
